

A: Boron testing is no longer required.

7. Q: Can you provide further clarification as to the requirements for testing for red fire ants

A: Red Fire Ant testing is no longer required.

8. Q: It appears that boron testing is an environmental scope item and the testing for red fire ants is a biological/pest control task. If we exclude these items from our SOQ is our response considered non-responsive?

A: These items may be excluded from the SOQ.

9. Q: Can the hardcopy submittal requirement be waived

A: The submittal requirements remain unchanged.
